6. Description

The project case4EU empowers teachers to educate students about active citizenship by providing them with the resources and support needed to teach relevant knowledge, skills and attitudes. Through the project, teachers have access to educational materials, including case simulations and lesson plans, which help to bring the subject of active citizenship to life for students. This allows teachers to provide students with a meaningful and engaging learning experience that will help them to develop the skills and knowledge needed to become active and informed citizens.

In addition to the educational resources provided, the project also offers training and support for teachers. This helps teachers to build their confidence and expertise in teaching about active citizenship and to incorporate the subject into their existing curriculum. The project also provides opportunities for teachers to network with their peers and to share their experiences and best practices, which helps to enhance the quality of education and to ensure that students receive a consistent and effective learning experience.

By empowering teachers with the resources and support they need, the project case4EU helps to ensure that students receive a well-rounded education that prepares them to become active and informed citizens. The focus on developing relevant knowledge, skills and attitudes helps to foster a lifelong love of learning and to inspire students to become active participants in shaping the future.

7. Assessment:

Yes

No

If yes, describe what kind of assessment/feedback is included in practice?
Several assessment tools are offered within the resources of the project.
